

Collegiate is Smarter than ever... ...it's Convertible!

The Collegiate Convertible close contact saddle is supercharged with the Easy Change Gullet System inside! This innovation allows you to change the width of the saddle gullet to match your horse's back and withers perfectly, regardless of his size or fitness level. Take a ride in a Collegiate Convertible—it's the educated choice for anyone who takes their equestrian activities seriously.

Horses' bodies change, just as ours do, with maturity, intensity of work routine, and level of fitness.

The Easy-Change Gullet System lets you alter the width of your saddle to custom-fit your horse's changing shape. Use our simple gauge to measure the width suitable for your horse's back, shoulders and withers. Then in a few short minutes you can adjust the gullet plate in your saddle for perfect clearance and comfort. It's easy as that!

Or maybe you ride multiple horses of different breeds and body sizes. With the Easy Change Gullet System, you can fit the saddle to each different horse without spending tons of money on additional saddles or bulky pads.

Easy-Change Gullet technology, now available in Collegiate saddles.
